

Temperature observations at each location

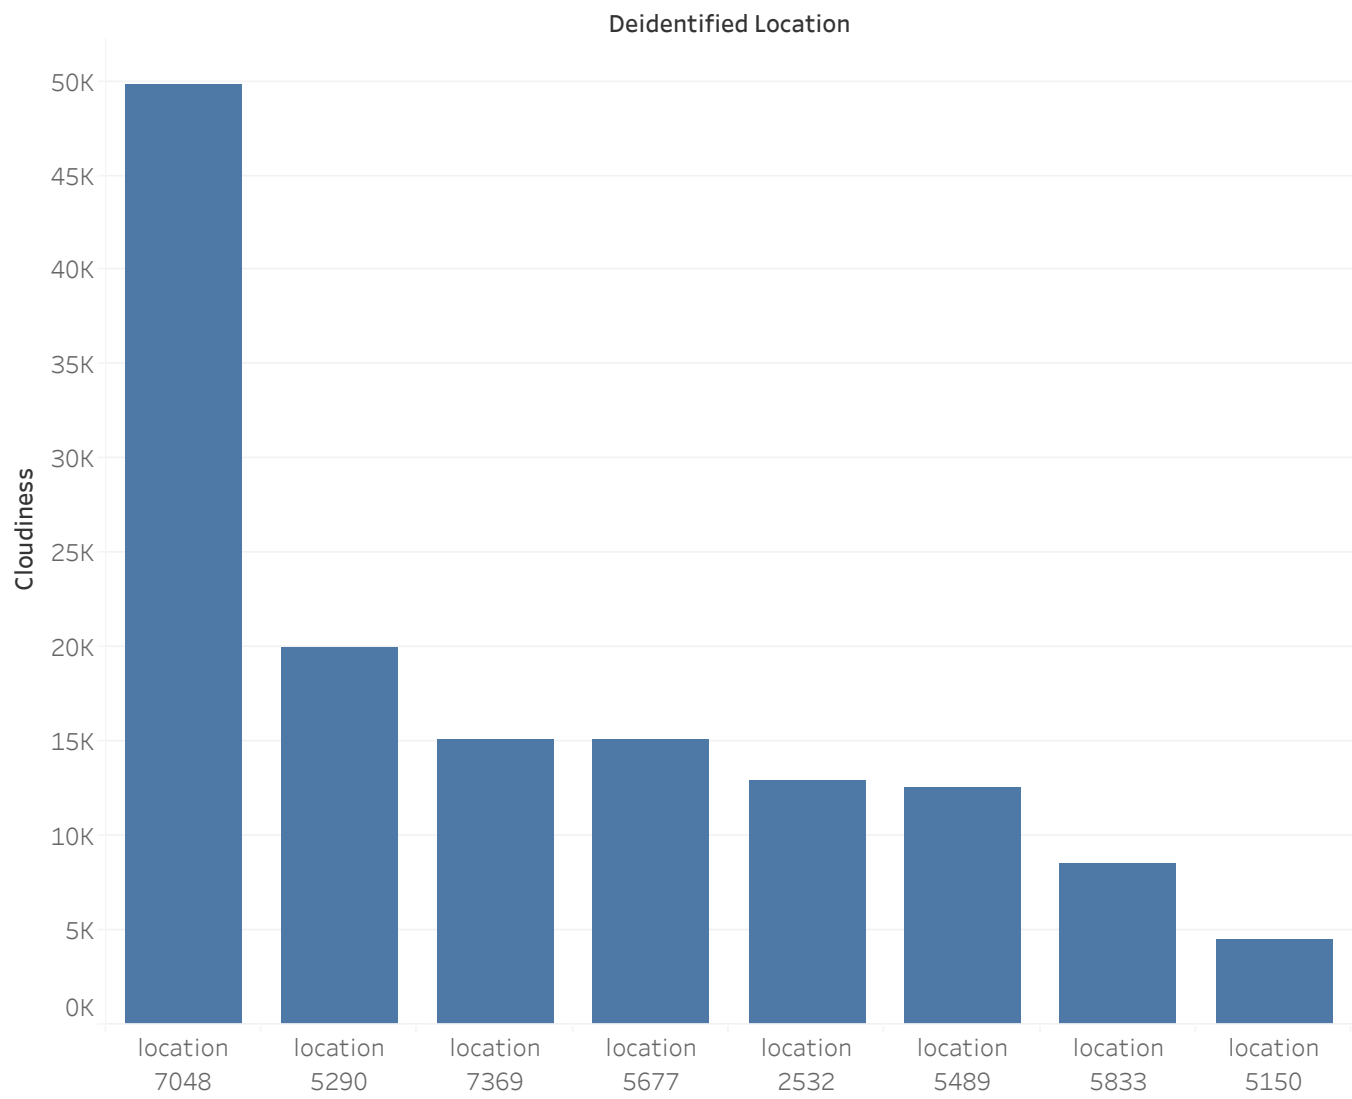

Median of Temp Obs for each Deidentified Location. Color shows details about Deidentified Location.

Temperature observations at each location

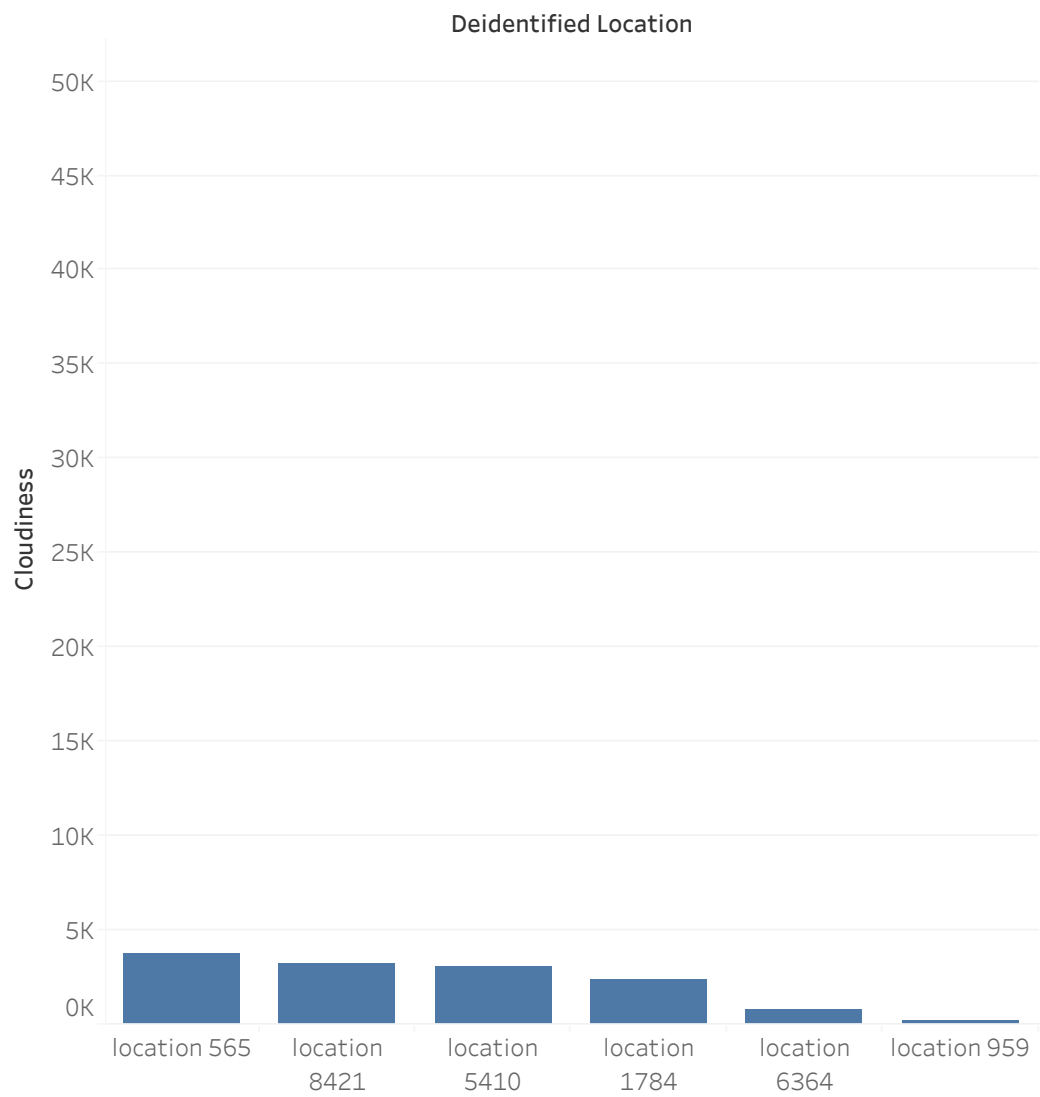

Median of Temp Obs for each Deidentified Location. Color shows details about Deidentified Location.

cloudiness at each location

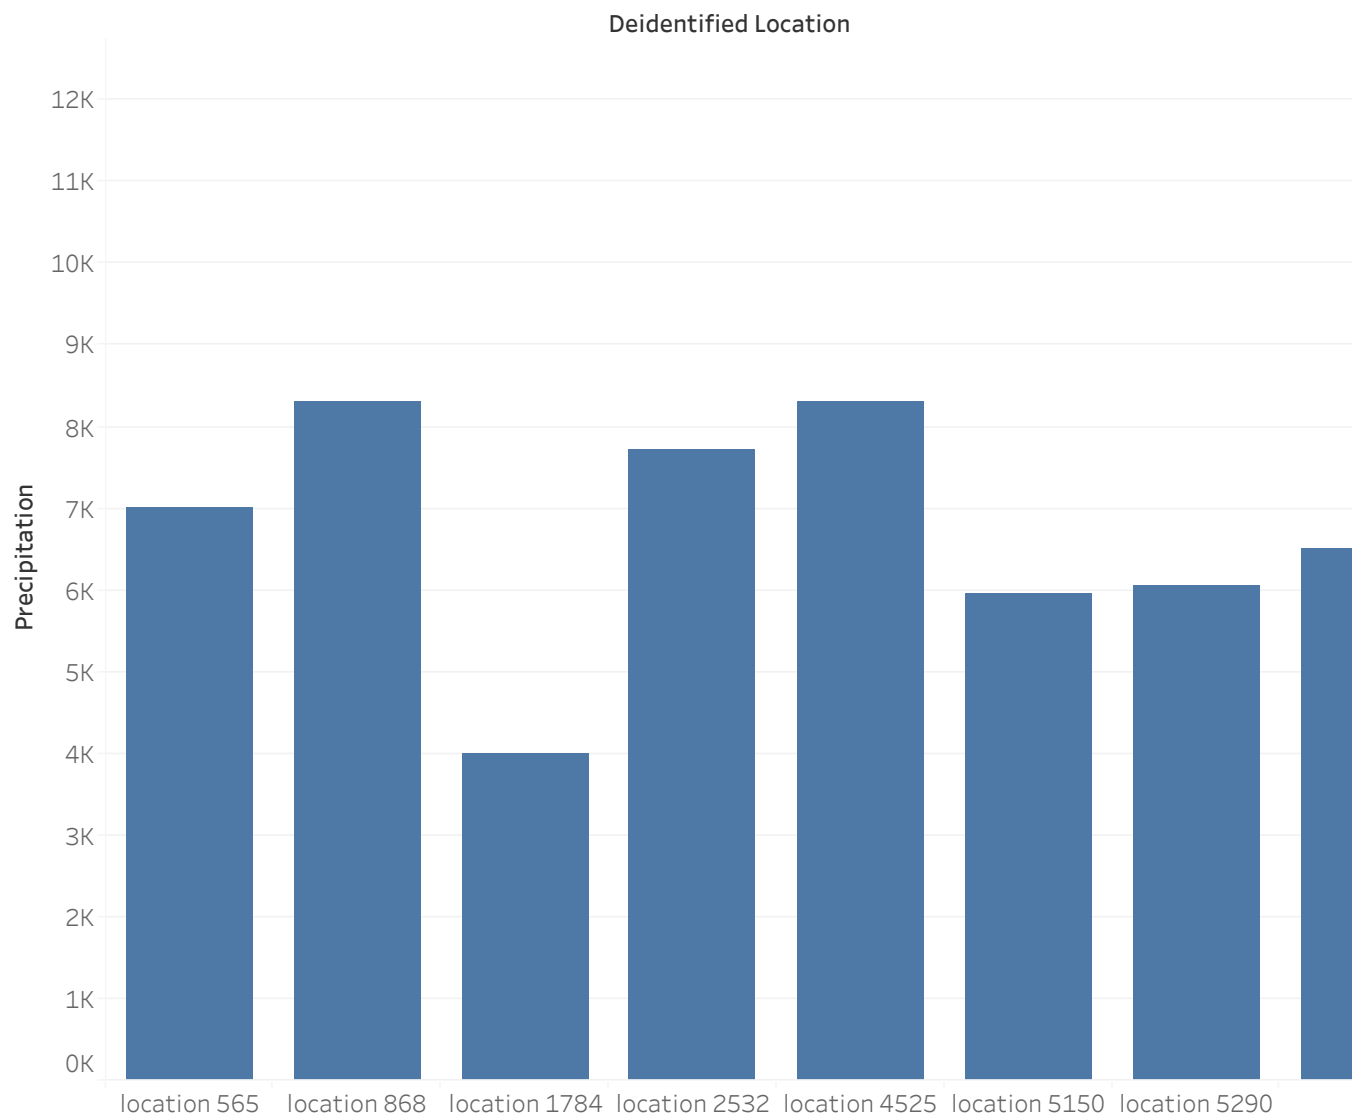

Sum of Cloudiness for each Deidentified Location. The view is filtered on sum of Cloudiness, which keeps non-Null values only.

cloudiness at each location

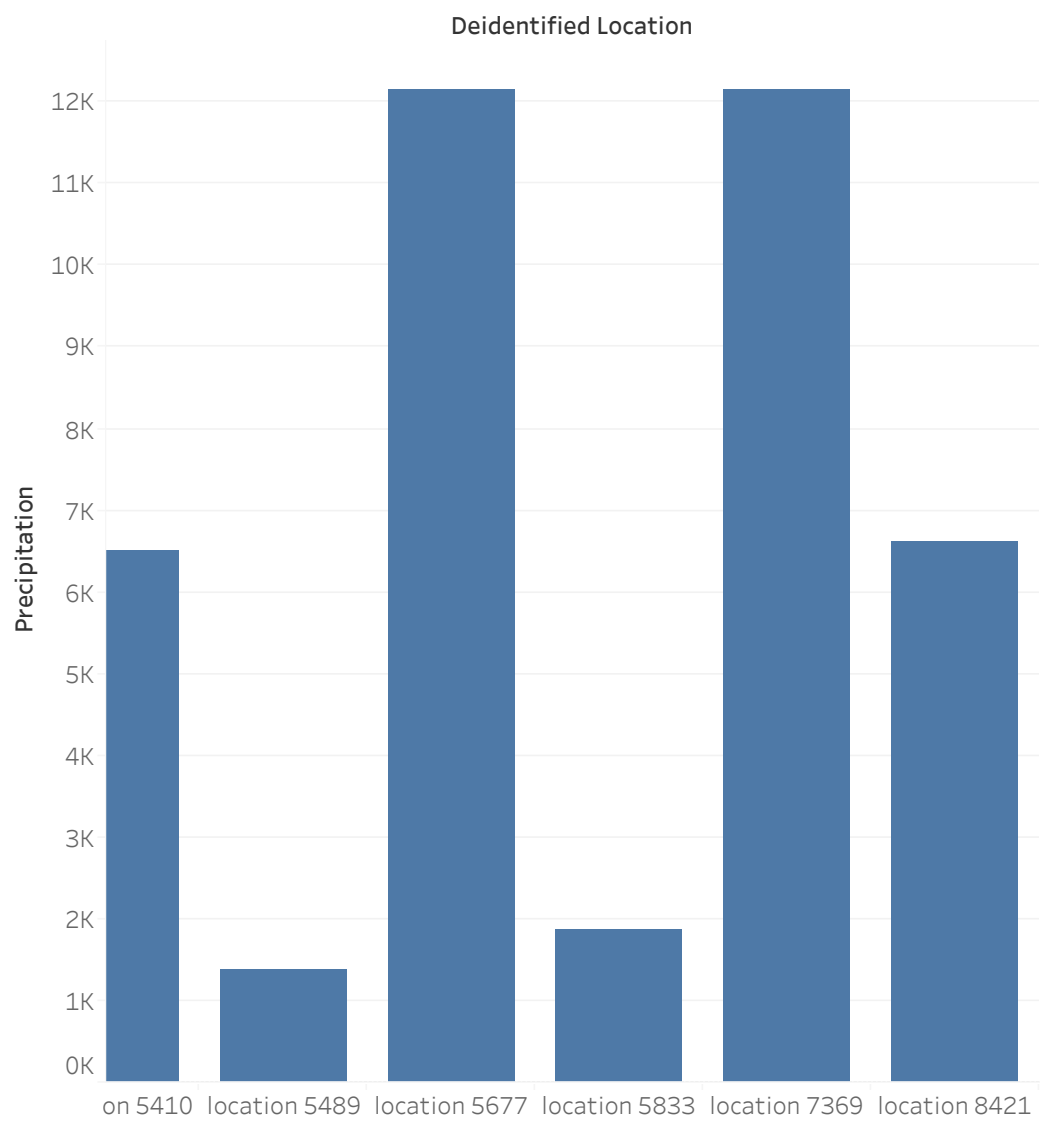

Sum of Cloudiness for each Deidentified Location. The view is filtered on sum of Cloudiness, which keeps non-Null values only.

precipitation at each location

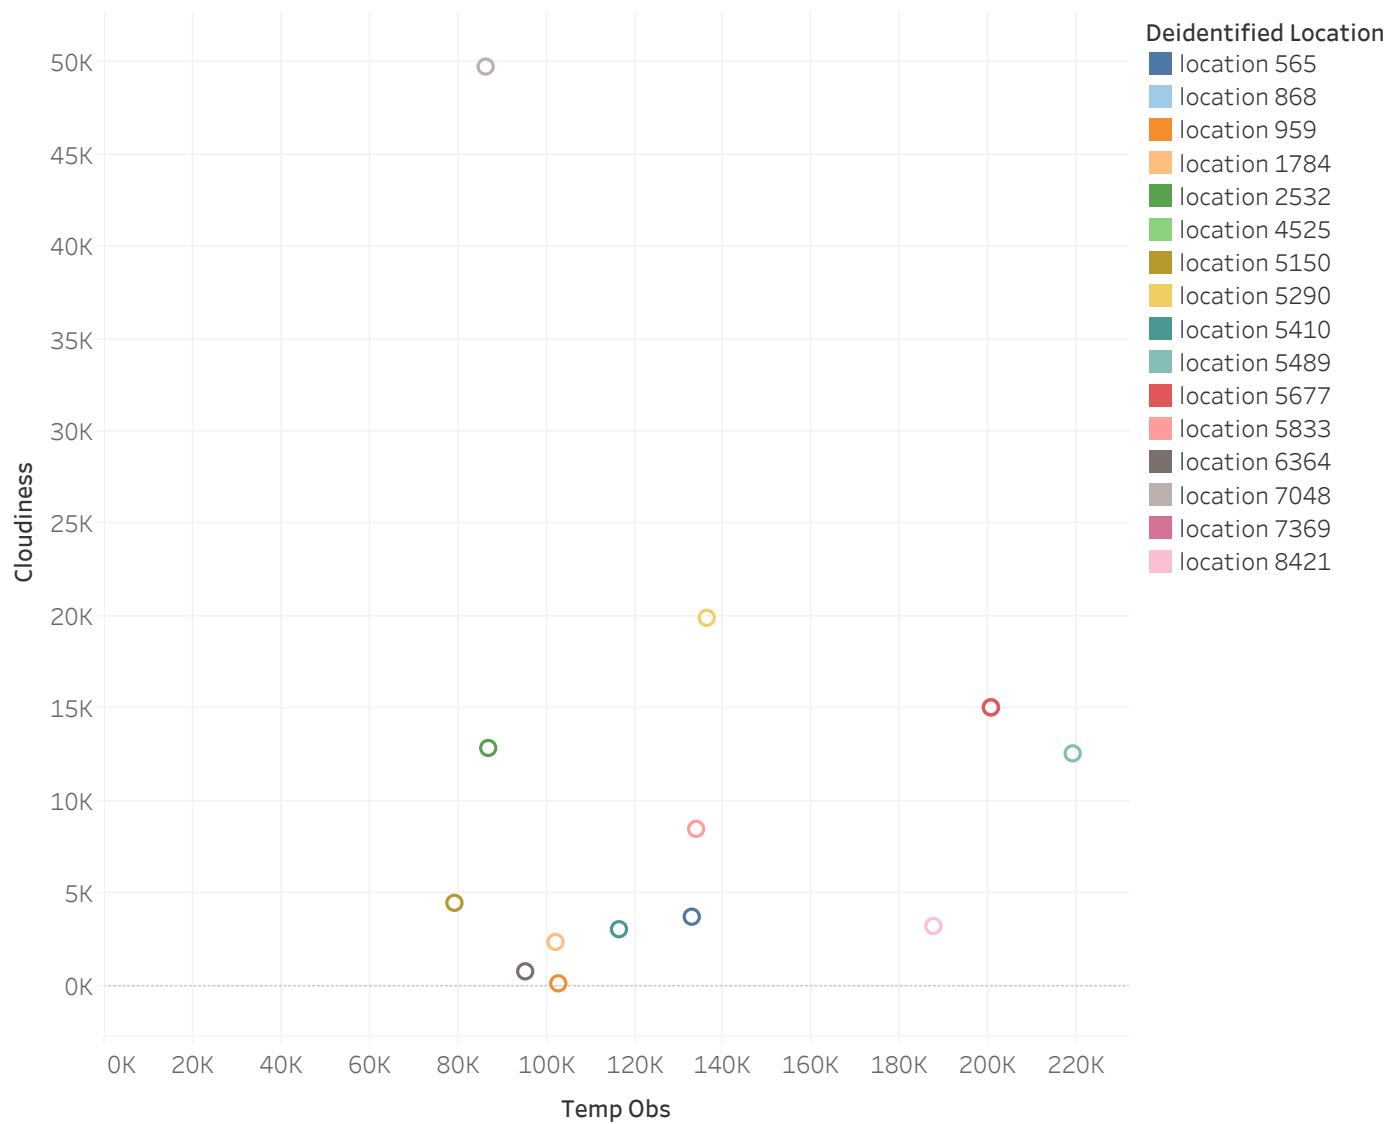

Sum of Precipitation for each Deidentified Location. The view is filtered on sum of Precipitation, which keeps non-Null values only.

precipitation at each location

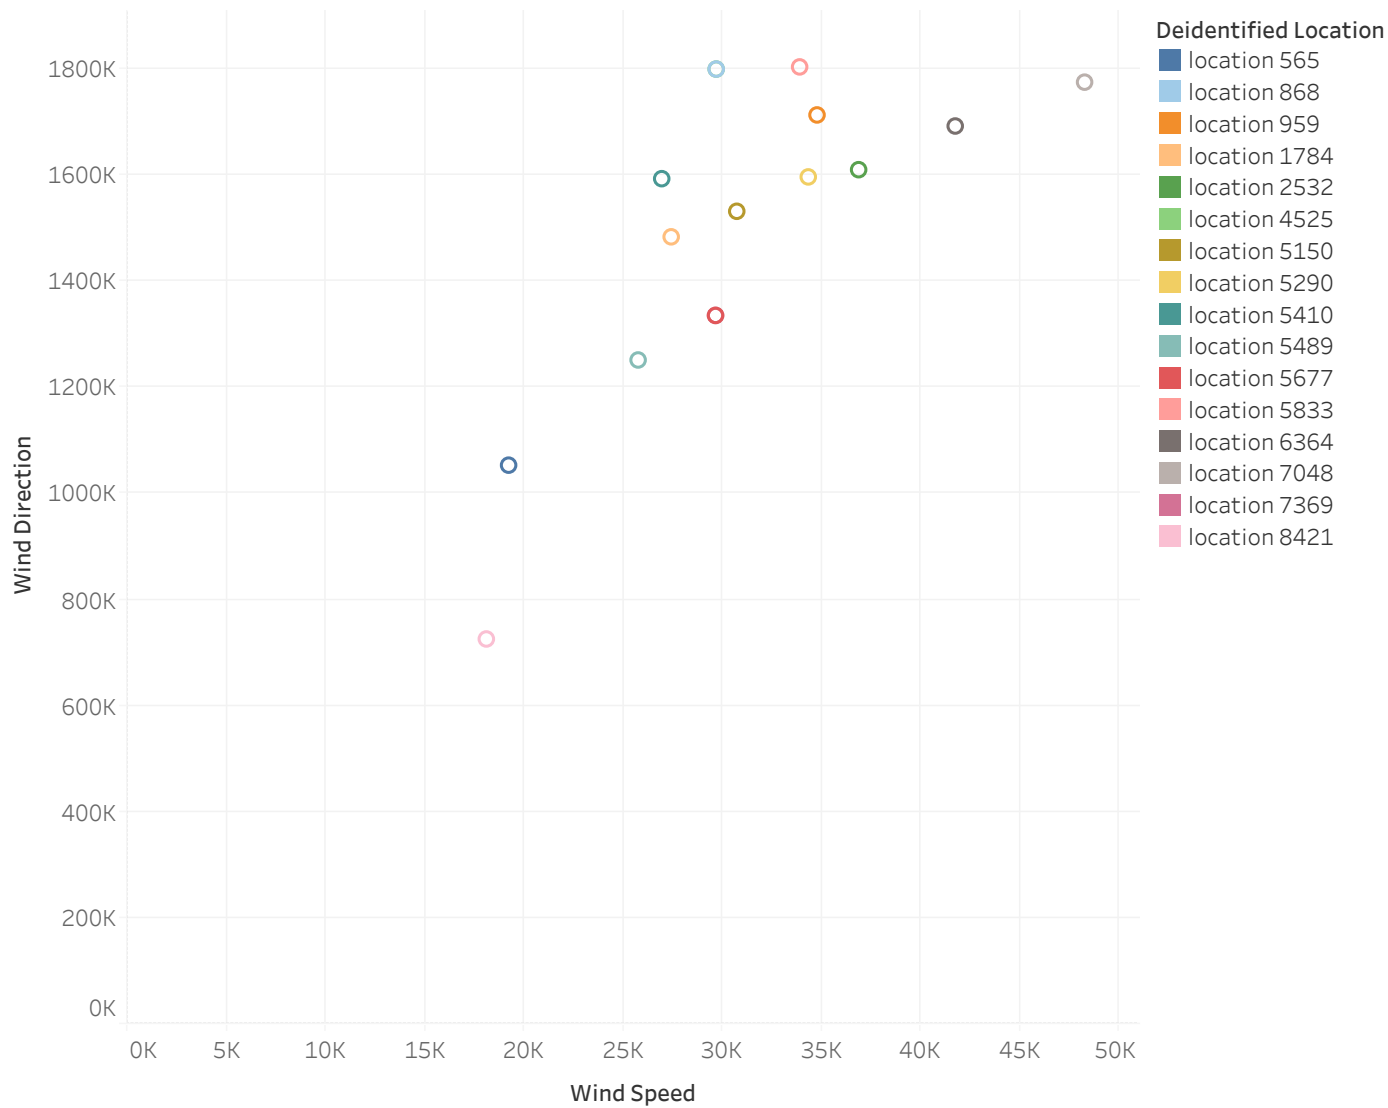

Sum of Precipitation for each Deidentified Location. The view is filtered on sum of Precipitation, which keeps non-Null values only.

relation btw cloudiness and temp obseravation

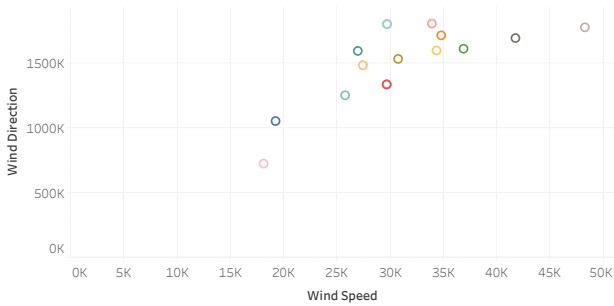

Sum of Temp Obs vs. sum of Cloudiness. Color shows details about Deidentified Location.

realation between wind direction and wind speed

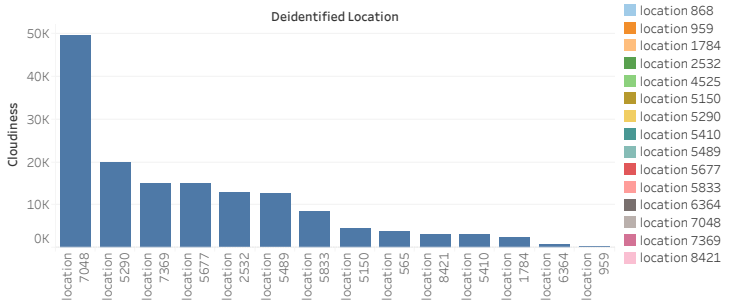

Sum of Wind Speed vs. sum of Wind Direction. Color shows details about Deidentified Location.

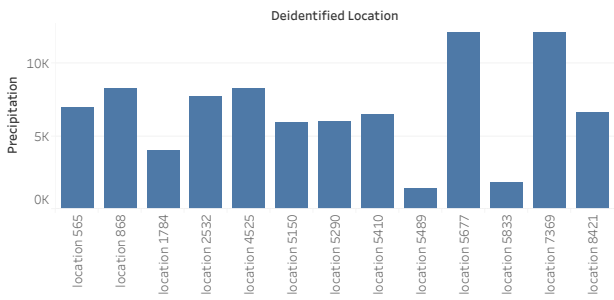

realation between wind direction and wind speed

cloudiness at each location

precipitation at each location
